

WHAT DOES IT TAKE TO

DEVELOP A BIOGAS PROJECT

A COMPREHENSIVE 1-DAY ONLINE WORKSHOP

25 NOVEMBER 2020

CONSIDERING A BIOGAS SOLUTION

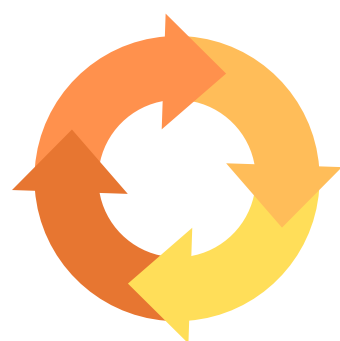

FOR YOUR FARM, ORGANIZATION OR BUSINESS?

This comprehensive, expert-led 1 Day Training workshop will equip you with practical understanding of the critical components needed to develop a biogas project given the current conditions in South Africa.

CONVERTING ORGANIC WASTE INTO BIOGAS AS A SOURCE OF ENERGY

has become an interesting topic for many farmers, abattoir owners, food processing plants and business entrepreneurs in the renewable sector over recent years. The challenge for anybody who has delved into the potential of developing a biogas project in South Africa is the debilitating lack of information available.

THE BIOGAS DEVELOPERS WORKSHOP

PRESENTED BY EXPERIENCED BIOGAS PROJECT DEVELOPERS

- Understanding what information is required.
- What parameters need to be met to develop a viable and successful biogas project.

Meet The Team:

Jobst Schulte-Brader

Mark Tiepelt

Egmont Ottermann

GAIN FIRST HAND KNOWLEDGE ON ALL THE BIOGAS BASICS

As well as other key factors like:

- Feedstock
- Energy Off-take
- Choice of Tech
- Choice of Contractor
- Financing
- Regulatory Requirements
- Operation & Maintenance

WORKSHOP COST & DETAILS

COST PER PARTICIPANT: R2000

Registration for course closes 20th November 2020. To register & receive payment information email jobstsb@resilient.africa

Further details of workshop times and platform will be shared upon registration.

SPECIAL OFFER

For Participants of this Workshop Only:

Engage on a **one on one basis** with an experienced biogas project developer to discuss and analyse your specific project.

For an **additional R1500** you will receive an individual session, analysis of the potential Biogas solution based on your available feedstock and a high level solution proposal.

Brought to you by:
